

FEP RR 09 MODEL

PLASTIC FIRE EXTINGUISHER CABINETS

The door of the fire extinguisher box door is anti-shock and it is made of acrylic ABS red RAL 3000. If protected by a proper box an extinguisher can be guaranteed for 5 years from color change. The box protects from dust, salt, fog, vapors and fumes of oil and its derivatives and chemical industry's dust.

The lock ties are made of EPDM which provides instant access to the fire extinguisher and prevents it from being disassembled accidentally.

PLACES OF USE

It is an ideal solution for industrial buildings, private residences, vehicles such as cars, caravans, trucks and boats.

THE FACTORS IT PROVIDES PROTECTION

- Dusts and powders in general
- Sea salt and humidity in general
- Oil's fumes and vapors
