

FW 600 SERIES

INDUSTRIAL FOAM CABINET WITH HEAT INSULATION

It has the ability to provide uninterrupted service even at temperatures below 0 °C, thanks to the foam cabinet specially designed for environments at risk of frost, the heater that keeps the temperature constant, and the specially dressed insulation material.

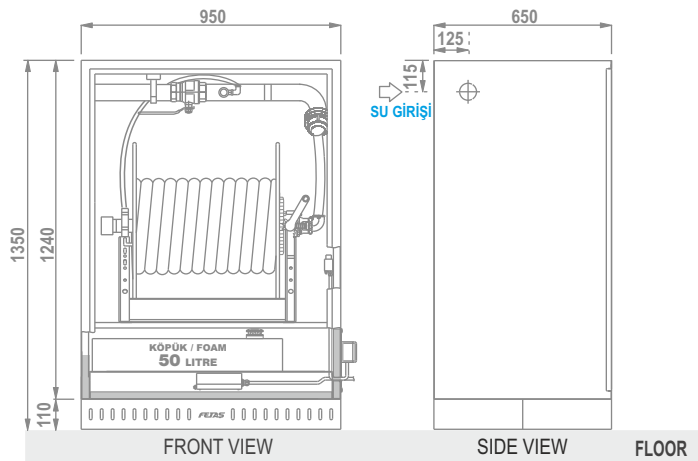

With only water feeding on the outside, it provides a fast and high-efficiency foam fighting opportunity by sucking from the foam concentrate tank within its structure.

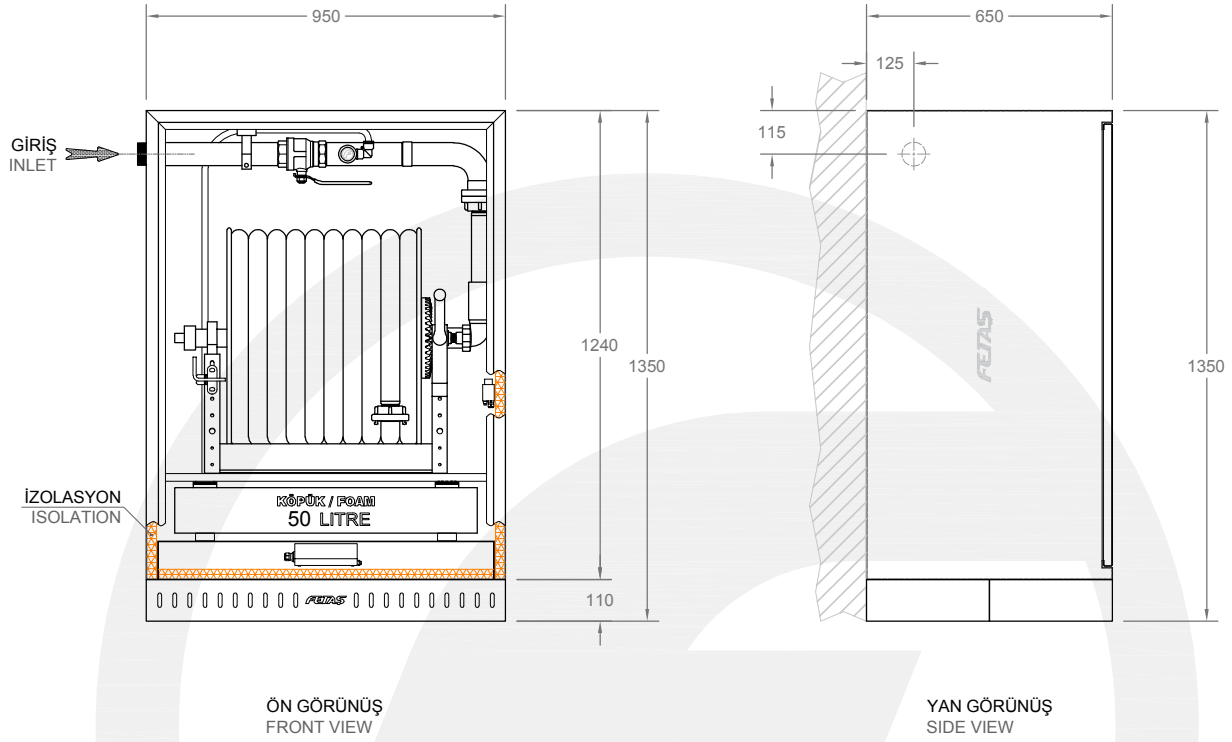

USAGE AREAS

It is especially ideal for industrial facilities, aircraft hangars, refineries, and similar industrial facilities where there is a risk of freezing due to the outside temperature.

STANDARD INSIDE EQUIPMENT

- 1½" or 1¼" high-pressure resistant semi-rigid rubber hose.
- Heavy-duty industrial hose reel with the front crank arm.
- Automatic ex-proof heater resistance and thermostat that ensures the internal temperature to be +5 °C continuously.
- Cabinet structure specially insulated against the external weather conditions.
- Optional grounding kit for the places where the risk of electric spark is not desired.
- Foam concentrate tank capacity can be designed according to the demands.
- With dense foam nozzle made of stainless steel.
- Three-stage foam mixer.
